BKSTS TRAINING

COURSE INFORMATION

Graphtec 90

Electronic Graphics for the Nineties

Regency Suite, London Zoo, Regents Park, London

May 17-18 1990

This two day seminar explores the technological issues associated with graphic design for television during the next decade; covering topics such as the role and influence of digital paint and edit systems, the use of computer animation and the organisational problems facing television companies as they prepare themselves for the 21st century, in a world dominated by real-time satellite based communication systems.

If you are involved in this exciting world of design, management and technology, this seminar is for you, as it will provide a rare opportunity to listen to and debate with a wide range of speakers already experienced in the implementation and use of this new technology.

Chairman and course co-ordinator:
John Vince, Rediffusion Simulation

Seminar Fee:
BKSTS Members £402.50 including VAT
Non Members £506.00 including VAT

FEE INCLUDES TWO DAY SEMINAR, LUNCH AND REFRESHMENTS
